SC-100

MIX VALUE COUNTER

Flexibility is essential in today's world. As cash processing demands shift and technology advances, the ability to scale operations up or down and seize new opportunities is crucial for organizations to remain productive and cost-effective.

The SC-100 is designed to be compact and modular, making it perfect for rapid cash counting in spaces where every inch counts. It boasts a standard throughput of 1000 banknotes per minute, with a large feeder capacity of 200 notes and continuous feeding to enhance efficiency.

- TFT Screen
- Static Electricity Erase Design
- 05 Currencies
- 110+ Kinds Of Currency Database
- Best for smooth and noise less Counting
