SCAN COUNT

SC-100

DIGITAL COUNTER

Flexibility is vital in today's world. As cash processing demands change and technology evolves, being able to scale operations up or down and take advantage of new opportunities helps organizations stay productive and cost effective.

Designed compact and modular, SC-100 is ideal for rapid cash counting where space is limited. It has a standard throughput of 1,200 banknotes per minute or 72,000 notes per hour with a large feeder capacity of 500 notes and continuous feeding for efficiency.

- TFT Screen
- Static Electricity Erase Design
- 10 Currencies
- 110+ Kinds Of Currency Database
- Best for smooth and noise less Counting

TECHNICAL SPECIFICATIONS

Item	Single pocket digital counting machine
Feeding System	Roller Friction System
Display Screen	TFT Screen
Counterfeit Detection	Magnetic, Infrared, Ultraviolet
Currency	10 Multiple Currencies
Error Detection	half-note, chain-note, double-note detection
Available Detection	110+kinds of currencies
Denomination Detection	IR Sensor
Add More	Allows Cumulative Counts
Counting Speed	800/1000/1200 notes/min
Hopper Capacity	500 pcs
Machine Dimensions	279 x 250 x 247 mm
Stacker Capacity	200 pcs
Thickness of Currencies	0.075-0.15 mm
Size Of Bank Notes	50 x 110-90 x 190 mm
Power Supply	AC 100-240V 50-60Hz
Power Consumption	≤80W
Net Weight	5.0kg
Package Weight	6.0kg
Options	External Display
Machine Ports	RJ-11 port
